

Work2Work

More control. Less effort. Full workshop reach.

Work2Work is the platform for fleet managers who want to manage service and repair orders efficiently, transparently, and scalably. No tenders, no comparison of offers – based on a uniform framework supply contract and an open workshop platform.

The challenge in fleet management

Typical situation today

- Tenders for every service or repair order
- Low participation from workshops
- High coordination and alignment effort
- Different prices and conditions
- Poor scalability with growing fleets

The new standard for service & repair

With Work2Work, you replace tenders with a clear, standardized workflow. You work with a framework supply contract that applies to all workshops, binding, transparent, and efficient.

Your advantages as a fleet manager

1

No offer silo, no restrictions

- Open platform for all registered workshops
- No limitation to pre-selected workshop circles

2

Maximum reach with minimal effort

- A request automatically reaches many qualified workshops
- No individual contacts and no tenders anymore

3

Uniform prices & conditions

- A central framework supply contract for all workshops
- No individual price negotiations, full transparency

4

Significantly less administration

- One contract, one order, one approval process
- No parallel alignments or renegotiations

5

Clear processes & full transparency

- All orders, confirmations, and status information centralized
- Overview of the entire fleet at any time

6

Scalable for any fleet size

- Suitable for small, large, and international fleets
- No additional organizational effort when growing

Data sovereignty, ecosystem, and future security

Full control over your data

- Clear data flows and complete data sovereignty
- No use of your data for foreign or non-competitive purposes

International data space standard

- Traceability and security
- Compliance based on internationally recognized standards

Open ecosystem instead of island solution

- Integration into existing workshop software
- Connection to ERP and supplier systems without system breaks

AI-capable architecture

- Technologically prepared for future AI-supported processes
- Support for workshops and fleet managers through automation

Take control of your fleet

Work2Work reduces complexity, increases vehicle availability, and gives you as a fleet manager clear processes and full control – today and in the future.
