work-2-work | FOR FLEET MANAGERS

More control. Less effort. Full workshop reach.

work-2-work is the platform for fleet managers who want to manage service and repair orders efficiently, transparently and at scale. No tenders, no comparing offers: one uniform framework supply contract and an open workshop platform.

The challenge in fleet management

Typical situation today

- ✕ Tenders for every service or repair order
- ✕ Low participation from workshops
- ✕ High coordination and alignment effort
- ✕ Different prices and conditions
- ✕ Poor scalability as fleets grow

The new standard for service & repair

With work-2-work, you replace tenders with a clear, standardized workflow. You work with one framework supply contract that applies to all workshops: binding, transparent and efficient.

Your advantages as a fleet manager

01 No offer silo, no restrictions
- ✓ Open platform for all registered workshops
- ✓ No limitation to pre-selected workshop circles

02 Maximum reach with minimal effort
- ✓ One request automatically reaches many qualified workshops
- ✓ No individual contacts and no more tenders

03 Uniform prices & conditions
- ✓ One central framework supply contract for all workshops
- ✓ No individual price negotiations, full transparency

04 Significantly less administration
- ✓ One contract, one order, one approval process
- ✓ No parallel alignments or renegotiations

05 Clear processes & full transparency
- ✓ All orders, confirmations and status information in one place
- ✓ An overview of the entire fleet at any time

06 Scalable for any fleet size
- ✓ Suitable for small, large and international fleets
- ✓ No extra organizational effort as you grow

Data sovereignty, ecosystem and future security

Full control over your data
Clear data flows and complete data sovereignty. No use of your data for third-party or non-competitive purposes.

International data space standard
Traceability and security. Compliance based on internationally recognized standards.

Open ecosystem, not an isolated solution
Integrates with existing workshop software. Connects to ERP and supplier systems without system breaks.

AI-ready architecture
Prepared for future AI-supported processes. Automation that supports workshops and fleet managers.

Take control of your fleet.

work-2-work reduces complexity, increases vehicle availability and gives you clear processes and full control, today and in the future.
